If You Want To Save Our Planet

Tune: If You're Happy and You Know It

If you want to save our planet, clap your hands.
If you want to save our planet, clap your hands.
It gets warmer every minute….so it's time we all begin it.
If you want to save our planet, clap your hands.

If you want to save a glacier, clap your hands.
If you want to save a glacier, clap your hands.
If you get your power from solar…..you can save a bear that's polar.
That's a way to save the planet, clap your hands.

If you like to drink fresh water, clap your hands.
If you like to drink fresh water, clap your hands.
But-if your water is in plastic….. sure the outcome will be drastic.
Use your good canteen instead, and clap your hands.

If you want to save the forests, clap your hands.
If you want to save the forests, clap your hands.
All the paper you recycle…… makes your trash into a trifle.
Leaving many more trees standing on our land

If you want to save the earth from CO2,
If you want to save the earth from CO2,
Ride to work on your "bi-sickle"….. cut your gas down to a trickle,
There are lots of other things that we can do!

If you want to stop disasters getting worse,
If you want to stop disasters getting worse,
Leave petroleum in the ground…and keep those windmills spinning round
Failing now to act becomes a curse.
